JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

month of April, 1903, from 156 cities, towns, and villages having an aggregate population of 7,910,600, show a total of 10,951 deaths, including diphtheria 247, enteric fever 105, measles 66, scarlet fever 131, whooping cough 86, smallpox 6, and 1,224 from tuberculosis.

The Monthly Bulletin says:

The April mortality is that of the average for five years past. Grippe perhaps caused 1,200 deaths; the reported deaths were 40 in New York City and 166 in the rest of the State. The mortality of early life is below the average, of old age it is excessive. Acute respiratory diseases have decreased from March. Pneumonia and Bright's disease, respectively, caused 1,067 and 692 deaths. Smallpox caused 3 deaths in Buffalo, 2 in Rochester, and 1 in New York; cases still prevail in Delaware, Chautauqua and Clinton counties; at Saranac, St. Regis Falls, and Malone a few; Elmira, 2 imported cases, and at Mechanicsville several recently discovered.

Saratoga.—Month of May, 1903. Estimated population, 15,000. Total number of deaths, 20, including enteric fever 1, whooping cough 1, and 4 from tuberculosis.

NORTH CAROLINA—Charlotte.—Month of May, 1903. Estimated population, 30,000. Total number of deaths, 48, including whooping cough 3 and 3 from tuberculosis.

OHIO.—Reports to the State board of health for the eight weeks ended May 9, 1903, from 62 localities having an aggregate population of 1,280,577, show 38 deaths from diphtheria, 144 from enteric fever, 5 from measles, 5 from scarlet fever, and 26 from whooping cough.

PENNSYLVANIA—Columbia.—Month of June, 1903. Estimated population, 13,500. Total number of deaths, 12, including enteric fever 1, and 3 from tuberculosis.

York.—Month of May, 1903. Estimated population, 37,000. Total number of deaths, 44, including 2 from diphtheria.
